Enzyme Treatment

Non-Chemical herbal Enzyme. Helps dissolve the protein and starch layer on the skin, leaving the skin with a healthy glow. Recommended for all skin types.

Peels

These treatments will effectively help to reduce the depth of surface lines, smooth out rough skin texture, help fade brown spots and assist in drying out acne/blemished skin. The naturally-occurring "fruit acids" in these treatments will remove dead cells from the skin's surface. Removing this top layer (where most visible wrinkles are) allows the healthier skin cells to come through, giving a smoother texture to your skin and a glowing and radiant appearance.

PCA Peel[®] exfoliating treatment

This is a proven and patented light to medium peel formula that effectively exfoliates, bleaches and inhibits pigment production. This peel is available in three formulas that help repair and reduce breakouts, control oil, soften lines and provide a more even, smooth skin texture.

PCA Peel[®] with Hydroquinone and Resorcinol exfoliating treatment

This peel is the most potent version of the PCA Peel[®] exfoliating treatments. It is a deeper peel that will provide more exfoliation for oilier, thicker, resilient skin types. It is for extremely sun damaged, thickened skin and can also be used to treat hands and arms. It is also excellent for those with active/cystic acne and asphyxiated skin (dry on the surface, oily underneath).

Sensi Peel[™] exfoliating treatment

Sensi Peel[™] exfoliating treatment was formulated primarily for Asian skin as well as all other extremely sensitive skin types. The Sensi Peel[™] exfoliating treatment is excellent for treating rosacea as redness and inflammation subsides substantially after the treatment.

Pumpkin Peel Beta-C Mask Treatment

Treatment is good for anyone at any age. It is a powerful antioxidant keratolytic treatment that can serve as an alternate between other peels and therapeutic treatments.

The Pumpkin Peel has simultaneous actions: it exfoliates and draws impurities out of the skin while introducing vitamins, enzymes and nutrients into the skin. As with all other PCA chemical peels there is no downtime. In fact, skin will be glowing and extremely healthy-looking following the treatment.

Supra Peel[™] exfoliating treatment

The Supra Peel[™] exfoliating treatment is designed for extremely sensitive and delicate skin, as there is little to no irritation or burning at the time of application. It is a moisturizing treatment due to the natural hormone and vitamin content, thus making it another great choice for aging, dehydrated and menopausal skin. There is absolutely no downtime, little to no exfoliation and the end result is an immediate tightening and brightening of the skin.

Ultra Peel[™] I and II exfoliating treatments

Ultra Peel[™] exfoliating treatments are appropriate for all skin types, conditions and sensitivities. These treatments are especially ideal for sensitive skin, as they produce a minimal stinging sensation. Ultra Peel[™] exfoliating treatments will effectively treat acne, pigment disorders, aging skin, smoker's skin and sun damaged skin.

For more dramatic results, both Ultra Peel[™] I and II exfoliating treatments can be used.

Moderate to aggressive exfoliation will be experienced, depending on the number of layers of Ultra Peel[™] I exfoliating treatment. Overall, the final result will be plump, hydrated and ultra soft skin.

Oxygenating Facial Trio

This treatment is an antioxidant therapy to ameliorate free radical damage. Oxidative damage is one of the more significant contributors to the aging process. The Oxy Facial Trio helps to stimulate respiration and circulation within the skin to promote healing, rejuvenate sluggish, tired skin due to toxins, pollutants, allergens, improper diet, solar damage, smoking and aging.

Oxygenating treatments leave the skin radiating with a healthy look that will last seven to ten days, which makes it ideal one or two days before a special event.
